## Reputable and reliable merchant providers for adult industry

I certainly hope this request can be taken with a degree of professionalism and seriousness.

We're in the adult business and are interested in providing unique services that the market demands. But we absolutely want to partner with a reasonable and reliable merchant provider who will service the industry with ethics and professionalism.

Can anyone please guide me to the right providers that might be able to assist us with a fair fee structure, chargeback fraud controls, and efficient payment of monies collected.

Your assistance in this matter is greatly appreciated.
