## IP Enable POS Terminals

Posted by DBorgs - 2005/04/25 20:27

Hi,

I am currently evaluating what IP-based POS terminal we are going to deploy. Currently we have only dial\_up POS from Verifone and Axalto, I have looked at both companies iP solutions and I do like the Verifone Terminals as it is an integrated unit. But I wonder what is your expereince with the Verifone 3750 family and what are the pit falls that I need to look out for.

Regards,

=====
